Daily Uses of an Ephemeris

There are many important uses of an ephemeris that readily are understood by a little study of astrology. But one of the most important uses, and one which may be applied by anyone, is the observance of the Moon's position by sign, its phases, and the use of the Daily Aspectarian.

On page 38 of Raphael's ephemeris is given the time of day, and the day of month, when the Moon and Sun enter each zodiacal sign during the year. Do not plant in Aries, Leo or Capricorn; the watery signs are more fruitful. Do not cut out wearing apparel while the Moon is in Leo. If a move or other venture is desired to prove permanent, start it when the Moon is in Taurus, Leo or Aquarius; preferably in Taurus. A removal made when the Moon is in Scorpio is apt to prove a "dirty move". Do not perform surgical operations while the Moon occupies the sign ruling the part of the body operated upon. Mental work should be started while the Moon is in an airy sign, aggressive enterprises while the Moon is in a fiery sign, and matter of fact business while the Moon is in an earthy sign. Do not hire servants while the Moon is in Scorpio or Capricorn.

From the conjunction of the Moon with the Sun to the Moon's opposition to the Sun, the Moon is increasing in light. From the Moon's opposition to the Sun to the Moon's conjunction with the Sun, the Moon is

decreasing in light. The day and time of day on which each of these conjunctions and oppositions take place is given in the aspectarian in Raphael's Ephemeris, starting on page 30. Everything that is to grow in the light of public recognition (or vegetables that are to grow above the ground), should be started while the Moon is increasing in light. Removals, journeys, new business, etc., (unless they are of a secret nature), will grow more successfully if started when the Moon is increasing in light. Secret agreements, detective work, and intrigue, will be more successful if started while the Moon is decreasing in light.

In the complete aspectarian, starting on page 30 of Raphael's ephemeris, will be found the time of day and the day of each aspect formed between the planets during the year. In starting any venture, make the commencement immediately before the time when the good aspect governing the matter is formed and the venture will prove more successful than it otherwise would.

For business transactions with the common people, and for favorable publicity, find a time when the Moon makes as many favorable aspects as possible.

For travel, writing or speech making, select a time to start when favorable aspects are forming to Mercury.

For seeking employment or favor from superiors, select a time when favorable aspects are forming to the Sun.

For social matters and affectional enterprises, as well as for artistic undertakings, select a time when favorable aspects are forming to Venus.

For mechanical work, manufacturing and aggression, select a time when favorable aspects are forming to Mars.

For selling anything, as well as for legal matters, select a time when favorable aspects are forming to Jupiter.

For buying and trading select a time when good aspects are forming to Saturn. For invention and occult study select a time to start when good aspects are forming to Uranus.

For promoting altruistic organizations, or stock enterprises and for psychic work, select a time to start when favorable aspects are forming to Neptune.

Note—The time of day the aspect is made as given in the ephemeris is for Greenwich. Therefore, in the U. S. the time of day the aspects form is EARLIER. If the time used where you reside is Standard Eastern Time, you must subtract 5 hours from the time given in the ephemeris; if Central Time, you must subtract 6 hours; if Mountain Time, you must subtract 7 hours; and if Pacific Time, you must subtract 8 hours. Thus in the ephemeris, page 30, the aspect Moon trine Sun is given on Jan. 12, 1927 as 10:53 p. m. This aspect would take place when the watch at New York shows 5:53 p. m.; at Chicago, 4:53 p. m.; at Denver, 3:53 p. m. and at Los Angeles, 2:53 p. m. When Daylight Saving time is used the time by the watch is one hour later.

To convince yourself, try the matter out. It will pay you to do so.
